

ARROW BRAND FOOD PLOT SEEDS

UPLAND GAME FOOD PLOT MIXTURE

Provides excellent winter cover. Good for food source and cover to increase winter survival. Good shooting cover. Balance of sorghums and millets with Sunflowers. Wild Game Food Grain Sorghum

Regular Hegari

Pheasant Acres Forage Sorghum

Black Oil Sunflowers

Proso Millet

Japanese Millet

Planting rate: 5-8 lbs/ acre in 30-36" rows. Reduce rate in 40" row. 10-20 lbs/ acre broadcast or drilled into firm weed free seedbed.

Planting Depth: ¾" to 1 ¼". If broadcasting, seed should be harrowed to provide seed soil contact.

Planting dates: May 25 to June 25. (Later dates will reduce grain fill.)

PHEASANT ACRES

Hybrid sorghum with heavy grain set for habitat. Medium tall (4 ½ ft to 6 ft). Good stand-ability. Birds like the grain and good cover as well. Good seedling vigor for establishment.

Planting Date: Late spring, early summer after soil temp 55 degrees, through June 20.

Planting depth: 1".

Planting Rate: 5 to 7 lb./ acre in 20" to 40" rows 15-20 lb./ acre broadcast.

WGF SORGHUM

An early maturing grain sorghum 2 ½ — 3 feet in height. The attractive red seed becomes palatable at maturity, and is readily consumed by quail, turkey, pheasant, and prairie chicken, as well as migratory birds, and deer. Holds lower leaves well to provide good between row coverage leading to better flush of birds. Mid bloom 43-50 days, Mature seed 85-100 days.

Planting Date: Late spring - early summer after soil temp 55 degrees, through July 1.

Planting depth: ½" to 1".

Planting Rate: 6-8 lb/acre in 30" to 40" rows Up to 25 lb./ acre broadcast.

REGULAR HEGARI

Hegari is a medium maturity, medium height (4' to 5 ½') white seeded dual purpose sorghum. Makes good cover and excellent grain producer for food plots. Good drought tolerance and excellent for dryland production for wildlife. Planting to mid bloom approximately 50-55 days. Plant type similar to Pheasant Acres but lower cost.

Planting Date: Late spring, early summer after soil temp 55 degrees, through July 1.

Planting depth: 1".

Planting Rate: 6 to 10 lb./ acre in 30" to 40" rows 15-25 lb./ acre broadcast.

JAPANESE MILLET

Japanese millet is an exceptional wildlife plant. A choice duck food eaten by waterfowl, upland game birds, and many nongame birds. Both the seed and vegetative parts are used. It also provides forage for deer. This robust annual ranges in height from 12 to 40 inches, depending on growing conditions. Leaf blades can be from one-to-three inches wide. For waterfowl, wetland areas planted in the spring should not be reflooded until the plants are at least six inches tall. Flood to 12-18 inches during the migratory season.

Planting Date: April through July, after soil temperature reaches 45 degrees.

Planting depth: 1/2" to 1".

Planting Rate: 15 – 20 lb./acre drilled. 25 - 30 lb./acre broadcast

DEER & TURKEY BUFFET

Mixture of legumes, brassica types, and grasses broadly adapted from semi-shady areas to field plots. Use along trails, and in open wooded areas. Good forage after established for spring, summer and fall use for food plots and cover.

Pinnacle Ladino Clover

Purple Top Turnips*

Festololium

Medium Red Clover

Orchardgrass

Teton Alfalfa

Intermediate wheatgrass

Rape Seed*

Purple Prairie Clover

WGF Sorghum*

* Annual, may volunteer back. Included only in spring plantings or interseed into mixture each spring once perennials are established.

Planting Date: April 10 - May 15,

August 20-September 10

Planting Depth: ½" — 1"

Planting Rate: 8-15 lb/ acre drilled. 20-25 lb. Per acre broadcast

DEER DELIGHT

High protein annual seed mix deer will relish. Great for drawing and building strong bucks. Extremely high nutritional value and palatability for adding point to your trophies score. Plant in very early spring for spring and early summer production. Re-plant in August for awesome fall and early winter drawing power.

Pulsar Forage Rape

Purple Top Turnips

Pinnacle Ladino Clover

Big Daddy Annual ryegrass

Planting Date: April 1 – May 1;

August 1 – September 1

Planting Depth: 1/8 to ¼ inch

Planting Rate: 10 -15 lb. per acre broadcast

TROPHY BANQUET

Bring 'em back year after year with this perennial forage legume mixture with awesome palatability, exceptional protein power, and great longevity. Includes some grass for nutritional diversity and habitat structure. East and West mixes available. Specify planting location when ordering for best adaptation to your conditions.

Complete Alfalfa

Norcen Birdsfoot Trefoil

Pinnacle Ladino Clover

Alsike Clover Orchardgrass or

Crested Wheatgrass

Planting Date: April 15 – May 15;

August 10 – September 10

Planting Depth: 1/8 to ½ inch

Planting Rate: 8 -14 lb. per acre broadcast
